TROPICAL GARDENS - 1220 41st AVE. - SANTA CRUZ, CALIF. - PHONE 5484-J

The following collection of orchids was secured from Mr. E. C. Wilcox of Arcadia, Calif. Mr. Wilcox, after many years of painstaking collection from here and abroad, particularly England, decided to sell out his entire collection of Cattleyas, and to concentrate on Cypripedium hybridization.

Mr. Wilcox has over the past twenty years, through selection, built up one of the finest collections of Cattleyas on the West Coast. Unfortunately, due to lack of time and space, the plants were allowed to go without potting for the past two years. We purchased his entire stock in January of this year, and since then we have repotted everything in mass, since many were far out of the pots and in great need of attention. At the same time, everything was sprayed and dipped and all are given a clean bill of health.

In going through the plants we tried to grade them fairly as to their condition, establishing three grades: Good, Fair, and Poor. This is for your convenience in selecting the plants. Most of the plants were returned to EZR GROW, however in some cases it was possible to pot in Osmunda, and therefore we have made up separate lists.

We hope that our many friends and customers will avail themselves of this opportunity to acquire some very choice plants from this fine collection. We have pictures of about one-third of the adult plants that are offered and have marked these plants with an asterisk (\*). We cannot forward these pictures but they are on display here at the greenhouses.

Here is one of your best opportunities to supplement your collection with fine orchids of proven quality.

On quantity purchases, we are offering the following discounts:--

\$50.00 to \$150.00.....10%  
\$150.00 to \$300.00.....20%  
\$300.00 to \$500.00.....25%

HYBRIDIZER CODE LETTERS:--

W---Wilcox  
M---Frank W. Gamble  
JU---Joe Urnston  
K---Kiesewetter  
OZ---Joe Ozzella

(All plants subject to prior sale. All orders will be packaged free and shipped by rail express, collect, unless instructed otherwise. 3% sales tax added for California purchasers. All purchases are cash or C. O. D.)

The following are in Osmunda

# *Care of* **ORCHIDS** *In the Home*

Plants should be placed near a window, provide for protection from mid-day sun. Light is essential.

**WATER** plants thoroughly when watering. Allow to dry out before watering again. Pots are light when dry, heavy when wet. Once a week is usually sufficient. It is advisable to spray the leaves frequently in hot or dry weather.

**CATTLEYAS** like the comfortable living room temperatures. They do not require fertilizing, and are most adaptable to conditions in the home.

**HUMIDITY** is essential. Plants can be placed in a bowl or flat tray, with an inch or so of gravel, which can be kept wet. Do not let the water touch the bottom of the pot. The pot should rest on the gravel—not in the water. The evaporation of the water will supply ample humidity for cattleya and allied genera.

**SHAFER**  
**TROPICAL GARDENS**

1220 41st AVENUE

SANTA CRUZ, CALIFORNIA

# Care of ORCHIDS In the Home

Plants should be placed near window, but not in direct sunlight. Day and night is essential.

**WATER** is the most important when watering. Allow the plants to get fairly dry before watering again. When the plants are fairly dry, it is advisable to spray them with water or dry weather.

**CATTLEYAS** like the comfortable living room temperature, and are most adaptable to indoor culture.

**HUMIDITY** is essential. Plants can be placed in a room with a high or so to drive, which can be kept at a high level. The bottom of the pot should not touch the water. The evaporation of the water will supply the humidity needed.
